## TESTIMONIALS

### EMC ENGINEERS:

I wanted to let you know that we're getting very good comments about the website your team designed for us. As you know, our site had become dated over the last few years without a major update, and quite honestly our engineers are great at engineering, but not so hot at writing engaging copy. We needed a more polished and sales-oriented site.

I appreciated the way you helped us determine the best content to offer and the most efficient way to organize it. I also liked having a number of different looks and page designs to choose from, and the way your team was always willing to work within our schedule.

Everyone's pleased with the finished site. When we direct a potential customer to the site, it's much easier to navigate, to learn more about the company and to get the information needed to make a decision in our favor.

I'm glad we made the decision in your favor.

Sincerely,

Doug Gray, VP Design + Consulting
